はじめに

本目録は、阿部永博士（元北海道大学教授・元北海道大学農学部博物館（現：北方生物圏フィールド科学センター植物園・博物館）館長）から寄贈された哺乳類標本約 9,000 点の目録である。

阿部博士は 1952 年の北海道大学入学以降、食虫目の分類及び生態学研究を現在に至るまで継続しており、その成果は様々な著書・論文として発表されている。当館は阿部博士の退官に際して、北海道大学入学前後から採集あるいは他の研究者との交換によって収集し、研究活動に利用してきた阿部コレクション（HA）の寄贈を受け、阿部博士の協力を得ながら整理を行ってきた。本目録はその成果である。なお、阿部博士が採集した標本のうち、博物館在職中に採集した食虫目以外の哺乳類標本や鳥類標本、魚類標本等は博物館所蔵標本として管理されており、それらは本目録には含まれていない。

凡例

本目録は阿部博士の協力の下、加藤克・高谷文仁・市川秀雄・谷亀高広が中心となり、以下の構成によって情報整理・編集を行った。

(1) 阿部コレクション（HA）は、管理番号 HA00001 から始まる連番によってすべての分類群の標本が管理されてきた。この番号は阿部博士の論文等だけではなく、他の研究者によっても用いられてきている。このため、当館の管理標本として登録するにあたって、その管理番号の意味を損なうことのないよう、阿部コレクションの管理番号に 50000 を加えたものを博物館の管理番号とすることとした（HA00001=HUNHM50001）。

(2) 標本情報は、阿部博士の標本台帳を基礎として登録し、2013 年 3 月までに標本と照合して確認作業を行った。

(3) 目録における学名記載および配列は、「Mammal Species of the World」3rd ed. (Wilson & Reeder 2005) に準拠し、各分類群内においては、管理番号順に標本情報を配列した。和名は「世界哺乳類和名辞典」（今泉 1988）に準拠している。

(4) 採集地については、紙幅の関係から市町村名までを記載することとしたが、各標本には詳細な情報が記載されているものも多い。詳細については博物館 (bgcontact2@fsc.hokudai.ac.jp) まで照会していただきたい。

(5) 一部の標本は他機関の研究者との標本交換により、剥製や骨格などの標本が博物館に寄贈されていないが、これらのうち、阿部博士の標本台帳に計測値情報が残されているものは、外部測定標本として取り扱い、目録に含めた。

(6) 標本の形態は目録において「Status」欄に数字で示すこととした。形態と数字の対応関係は以下のようになる。

- | | |
|----|-------------------------------|
| 1 | 剥製・皮：skin |
| 2 | 頭骨：skull |
| 2a | 頭骨液浸：skull in fluid |
| 3 | 全身骨格：skelton |
| 3a | 部分骨格：partial skeleton |
| 4 | 液浸（剥皮した胴部）：remainder in fluid |
| 4a | 液浸（全身）：fluid |

| 7 | 乾燥死体：dry body |

Preface

This collection consisted of about 9,000 insectivora specimens was donated by Dr. Hisashi Abe, retired professor in Hokkaido University Natural History Museum (Present; Director of Hokkaido University Botanic Garden & Museum, Field Science Center for Northern Biosphere). Dr. Abe has been studying about taxonomy and biology in insectivora since entrance of Hokkaido University in 1952, and the accomplishments of the studies have been published as books and scientific papers. We have organized and described the donated specimens, so-called 'Abe collection (collection number: HA)', in this catalogue with help from Dr. Abe. Meanwhile, specimens except for insectivora, such as fish and Aves, are maintained as other collection of our museum.

Legends

Dr. Masaru Kato, Mr. Humihito Takaya, Mr. Hideo Ichikawa and Dr. Takahiro Yagame organized the information of the 'Abe collection' as follows.

- 1) 'Abe collection' had been organized the numbers in sequence date from HA00001 and researchers containing Dr. Abe had used these numbers. In order to preserve the original sequence numbers, we added 50000 to HA sequence numbers to organize this collection. (HA00001=HUNHM50001)
- 2) Information of the specimens was deposited to this catalogue based on ledgers written by Dr. Abe, and the information accuracy had been confirmed until March 2013 by comparing between description and specimens.
- 3) We referred an order of scientific name and Japanese name to 'Mammal species of the World 3rd ed (Wilson & Reeder 2005) and 'A World List of Mammals with Japanese Names'(Imaizumi 1988). Information of the specimens in each taxonomic group was listed in order of HA number.
- 4) Information of the sampling sites was described at municipality levels. For additional information of the collection, please ask us(bgcontact2@fsc.hokudai.ac.jp).
- 5) Because of specimen exchanges, portions of the Abe collection were not maintained in our museum. However, information of these specimens described in ledger of Dr. Abe was also contained as 'Specimen of external measurement' in this catalogue.
- 6) Regions and states of the specimens were shown on the 'Status' column as follows.
1. skin; 2. skull; 2a. skull in fluid; 3. skelton; 3a. partial skeleton; 4. remainder in fluid; 5. tissue;
6. external measurement; 7. dry body
